Experience

AUG 2017 - PRESENT

MENTORED, NYC - *Software Developer, Full Stack*

- Collaborated with tech lead to build new platform with Ruby on Rails from scratch which allow admins to quickly build whitelabel platform instances for experts offering premium content and experience.
- Incorporated Minitest for Ruby on Rails which decreased code defects and reduced regression bugs with robust unit tests and integration tests.
- Intermittently ensure software quality by leading small team of contracted QA testers.

MARCH 2017 - JUNE 2017

OMADA DIGITAL, NYC - *Web Developer*

- Developed custom WordPress plugin which utilizes custom templates to transform affiliate content to increase user's call-to-action clicks.
- Delivered quality products with responsive design, browser compatibility, and implementing fixes.

Skills

Languages & Frameworks/Libraries: Ruby | Rails | Javascript | PHP | React | Angular | Node

Tools & Methodologies: TDD | Git | Minitest | CircleCI | Heroku | Pivotal Tracker | Taiga

Education

GENERAL ASSEMBLY, NYC - *Web Development Immersive*

Learned to build and access APIs, and design front ends to consume data and display it for the best user experience. Learned best practices for writing maintainable code, and used industry standard style guides for optimal readability of code.

Projects

- The Playlist - took charge to design and develop RESTful architecture with CRUD functionality written in Node and Express for team project.
- Food Around Me - created a full stack web application which utilized various APIs (Yelp, Google Maps, Speech Recognition) to transcribe user's speech and search Yelp based in their current location.

HUNTER COLLEGE, NY - *BA in Computer Science*

Relevant Courses: Android App Developer, Data Structures & Algorithms
